Industrial Research in a Science and Technology Company

Merck KGaA is a unique company in many ways. We have very significant businesses in pharmaceuticals, in life sciences, and in highly differentiated performance materials. There are no other companies that span these business dimensions, each at world-class leadership levels. This talk is intended to provide the audience (especially the students and post-docs) with a glimpse of the types of research that are being done at Merck KGaA, the internship and employment opportunities available, and a brief introduction to one Clarkie (me), who has enjoyed a wonderful career after a great Clark education!
