MASTER OF BUSINESS ADMINISTRATION

Our MBA program provides you with a firm foundation in leadership and corporate accountability. You acquire the knowledge and skills necessary to address the ever-changing issues facing modern business leaders.

We are committed to responsible, ethically minded leadership. Our program is designed for aspiring leaders who want to take businesses in socially responsible directions in order to make a real, lasting difference.

You learn essential business skills in a culture with a high regard for forward-thinking, socially responsible management practices. We have a strong commitment to the Principles for Responsible Management Education (PRME), integrating sustainability and social responsibility into our research and teaching. By studying the legal, political, ethical, social and environmental responsibilities of management, you gain an integrated perspective and cross-sector skill set that uniquely position you to impact both your organization and society.

- AACSB accreditation—the hallmark of excellence in business education, earned by fewer than 5 percent of the world’s business schools
- Recognition by the Princeton Review in 2016 as one of the Best 295 Business Schools
- Collaborative learning environment where you receive personal attention from scholar-practitioner faculty
- Evening classes available on our campuses in Worcester and Southborough

PROFESSIONAL TRACK

If you have been working for three or more years in a professional position with managerial experience, we are happy to recognize your experience and the important perspective you bring to the classroom by offering an alternate curriculum better suited to your experience.

In this track, you will have the opportunity to waive up to two courses (depending on experience) and pursue coursework focused on leadership and decision-making—important skills for mid-level professionals looking to advance quickly.
