Our M.S. in Finance program integrates strong finance and quantitative skills with an understanding of the complexities of management. You combine theory and practice through rigorous case study analysis, extensive use of software, team-based courses and close working relationships with research and practitioner faculty.

The degree benefits you no matter where you are in your career and prepares you for positions in banking, investment management, trading, insurance, and corporate finance.

Our emphasis on management contexts helps you learn how to apply financial strategies in the real world, which lets you hit the ground running at almost any institution. You learn essential skills in a culture with a high regard for responsible leadership. We have a strong commitment to Principles for Responsible Management Education (PRME), integrating sustainability and social responsibility into our research and teaching. By studying legal, political, ethical and social issues, along with technical finance knowledge, you gain an integrated perspective and interdisciplinary skill set that uniquely position you to impact both your organization and society.

- Accredited by AACSB International—a designation shared by fewer than 5 percent of business schools worldwide
- Emphasis on solving practical, real-world problems in finance
- Featured in the list of Princeton Review’s Best 295 Business Schools of 2016

### DEGREE

**Master of Science in Finance**

### DEGREE REQUIREMENTS

The degree is offered as a full-time cohort program — consisting of 10 courses and a professional internship — that is completed during three semesters and one summer. There are four prerequisite courses that must be completed before enrolling: Economics, Statistics and Calculus.
