Computer Science
Li Han

Department Profile

Computer science has about 30 majors and 5—10 minors. Most majors will go on to employment or graduate programs in computer science.

Communities of Effective Practice

Currently, we have the diving into research groups, undergraduate TAs, system administrators for computer lab, ACM student club, self-organized student groups based on common interests, community of peers.

Departmental Goals

For Teaching

Maintain high standards for our majors;
Develop in students
• an appreciation and desire for knowledge and life-long learning;
• strong conceptual and logical understanding of the theory;
• practical skills in computer science techniques;
Foster creativity, independence, discipline, responsibility and ethical behavior;
Prepare students for graduate studies, and/or careers in the private sectors.

LEEP Learning Outcome Set 2: Writing

Classification: most writing done by computer science students is the writing of programs. There is also writing of theoretical analysis, proofs, documentation and reports.

LEEP Learning Outcome Set 5: Collaboration

LEEP Learning Community #2

The Major
