

F-CHEC[✓] is a 501(c)(3) nonprofit corporation formed to foster and promote a greater understanding and public awareness of the health effects of living near and/or having historical or current employment at the former Department of Energy (DOE) uranium processing plant at Fernald, Ohio. We believe that improving health education in the community will lead to a better understanding of potential health risks associated with exposures from the site. This better understanding can improve preventive health strategies, target medical screenings, and support individual decisions regarding lifestyle and health care.

We invite you to join our organization; we need *you!*
