Help Document Series: Connecting to ClarkWiFi with Apple OS 10.6-10.9

If your computer is running **OSX 10.5 or older**, you will not be able to connect to the network.

**Step 1.**
In the top right corner of your screen, click on the wireless connection icon. This will bring up a list of available networks; click on ClarkWiFi.

**Step 2.**
A window will pop up requesting your Clark username and password. You must put your Clark email address in the User name field; `username@clarku.edu`. If you are still using the original password that you were given (CU:xxxxxxxx), then you will need to change it.

*You might need to enter your Clark Account credentials more than once before successfully connecting to ClarkWiFi.*

**Step 3.**
A window will appear that will prompt you to accept a networking certificate for ClarkWiFi. You should click **Continue**.

**Step 4.**
OS X will now prompt you to provide your local computer’s username and password to make the changes to your **Certificate Trust Settings**.

If you have any questions, or require further assistance, please contact the ITS Help Desk at **508.793.7745** or helpdesk@clarku.edu.
